

**TOWN BOARD AGENDA
REGULAR MEETING**

(All items listed for discussion and possible action)

Virtual Meeting

**Thursday, February 17, 2022
6:30 p.m.**

1. Call to Order
2. Roll Call of Board Members
3. Audience Participation Period (limit 4 minutes per speaker)
4. Consent Agenda
 - a. Approval of Minutes – January 20, 2022
 - b. Treasurers Report – January 2022
5. For Possible Action
 - a. Resolution 02-2022 Cancelling the April 5, 2022 Regular Election and Declaring Candidates for the Offices of Trustees Elected
 - b. Approval of Municipal Judge Agreement
6. For Discussion
 - a. Draft Ordinance Allowing Marijuana Delivery
 - b. American Rescue Plan (ARP) Funds
 - c. Gates
7. Reports
 - a. Correspondence
 - b. Mayor
 - c. Members of Town Board
 - d. Staff
8. Future Agenda Items
9. Adjournment

MINUTES

BOARD OF TRUSTEES MEETING

January 20, 2022

Call to Order/Roll Call

The virtual meeting was called to order at 6:30 p.m. via Zoom.

The following Trustees were present: Amy Snell-Johnson, Debby Farreau, Scott Freas, Pam Thompson, and Acting Mayor Pro Tem Josie Cockrell. A quorum was present.

Consent Agenda

Acting Mayor Pro Tem Cockrell asked if anyone had questions regarding the items on the consent agenda. Trustee Thompson requested the December financial reports be removed from the Consent Agenda, which was done.

- a. Approval of Minutes – January 6, 2022
- b. Financial Reports – December 2021

Acting Mayor Pro Tem Cockrell moved to approve the January 6, 2022 minutes, seconded by Trustee Thompson. The motion passed by unanimous roll call vote.

Trustee Thompson asked if the engineering costs included road maintenance and paving management. Town Administrator Proctor stated that they did not, SEH has not yet begun that work for 2022. She suggested it's time to do another RFP for Town engineering.

Trustee Thompson moved to approve the December 2021 financial reports, seconded by Acting Mayor Pro Tem Cockrell. The motion passed by unanimous roll call vote.

For Discussion

Draft Ordinance Allowing Cannabis Delivery

The Board requested additional information regarding the permitting process. Deputy Town Clerk Gallivan will research this.

American Rescue Plan Funds

Town Administrator Proctor noted there is new guidance for allowable expenditures and that means Foxfield may spend the entire amount of the funds on a wide range of government services.

Trustee Farreau suggested spending the money on road maintenance is okay, but she would also like to see the Town reach out to local businesses first for their funding needs. Town Administrator Proctor noted that only two of the businesses in the Foxfield Village Center requested and received CARES funds in 2020. Town Administrator Proctor was asked to reach out to other municipalities to ask how they are handling distribution of ARP funds to local businesses.

Trustee Snell-Johnson would like to use some of the ARP funds for expanding communications with residents, including software for texting residents.

The Board also asked if the Fire Department could evaluate the wildfire risk for Foxfield and if there are things that can be done to mitigate that risk.

2021 Financial Forecast Update

Town Administrator Proctor noted the Town is under budget for 2021 and that sales tax revenue is higher than anticipated.

Reports

Members of the Town Board

Trustee Farreau reported that she spoke to an ACSO deputy who drives through Foxfield twice a day, on her way to and from her shifts. The deputy told her it is fine for the Town to change the code for the keypad as long as we make sure ACSO knows the new code. She also again brought up the idea of a gates committee.

Trustee Thompson asked for an update on the Allen litigation. Town Attorney Hoffmann reported oral arguments will commence on February 23. Trustee Thompson also asked for a total cost of the gates, which Town Administrator Proctor will provide.

Trustee Freas suggested we do change the code on the gate keypad.

Acting Mayor Pro Tem Cockrell would like to move forward with a gates committee to hold public meetings to solicit input from the public regarding the gates. There was discussion as to whether or not this would be a subcommittee of the Board or if it might include Board members as well as residents. It was decided to table the discussion until the full Board is in attendance. Acting Mayor Pro Tem Cockrell also reported on a DRCOG discussion regarding regulation of controlled intersections for bicyclists.

For Possible Action

Following up on a discussion from the last meeting, it was agreed that the afternoon gate beginning time of 3 pm is disruptive to carpools and difficult for school buses. Trustee Thompson moved to change the afternoon timing on the Richfield gates to 4pm to 7pm, seconded by Trustee Snell-Johnson. The motion passed by unanimous roll call vote.

Town Staff

Town Administrator Proctor reported she is working on a bid for gate cameras. The only one received so far is for \$10,000. She and Mayor Jones are working to schedule a meeting with the Sheriff's Department to discuss this issue.

Town Administrator Proctor also spoke with Arapahoe County about their emergency notification system, ArapAlerts. They reported that 107 Foxfield residents have signed up for the notifications. Town Administrator Proctor suggested some outreach to get more residents to sign up. She also noted that the Board previously approved funding for a texting system from Ring Central, which Deputy Town Clerk Gallivan is working on.

Deputy Town Clerk Gallivan reminded the Board that the deadline to return nomination petitions for the April 2022 elections is the following day, January 24th. As of the time of the meeting, only one petition has been received.

Future Agenda Items

- Cannabis delivery
- American Rescue Plan expenditures
- Gates committee

Adjournment to Executive Session

Acting Mayor Pro Tem Cockrell moved to adjourn the meeting at 7:50 pm to an Executive Session pursuant to 24-6-402(4)(b) C.R.S. for the purpose of receiving legal advice regarding appointed Town officials. Following a second by Trustee Farreau, the motion passed by unanimous voice vote.

At 8:08 pm, Acting Mayor Pro Tem Cockrell moved to adjourn the executive session, seconded by Trustee Farreau. The motion passed by unanimous roll call vote.

Randi Gallivan, Deputy Town Clerk

Josie Cockrell, Acting Mayor Pro Tem

MEMORANDUM

TO: Mayor Jones and Members of the Board

FROM: Randi Gallivan, Deputy Town Clerk

DATE: February 17, 2022

RE: Election

DISCUSSION:

Attached is a resolution canceling the April 5 election and declaring Dave Goddard elected as Ward 2 Trustee. He will be sworn in on April 7, 2022.

The election is being canceled as there was only one candidate for Ward 2 Trustee and no candidates for Wards 1 or 3.

The next step is the solicitation of applicants to fill the open seats.

RECOMMENDED MOTION:

"I move to approve Resolution 2022-02 Canceling the April 5, 2022 Election and Declaring Candidates for the Offices of Trustees Elected."

ATTACHMENT:

Exhibit A: Resolution 2022-02 Canceling the April 5, 2022 Election

Trustee's Resolution

Resolution No. 02, Series 2022

**A RESOLUTION CANCELING THE APRIL 5, 2022, REGULAR ELECTION AND
DECLARING CANDIDATES FOR THE OFFICES OF TRUSTEES ELECTED**

WHEREAS, pursuant to C.R.S. § 31-10-507, the Town may cancel an election when the only matter before the voters is the election of persons to office, and when at the close of business on the sixty-fourth (64th) day before the election, there are not more candidates than offices to be filled at such election, including candidates filing affidavits of intent to be write-in candidates;

WHEREAS, the deadline for filing nomination petitions was January 24, 2022, and there were not more candidates nominated than offices to be filled at the April 5, 2022, election;

WHEREAS, the deadline for filing affidavits of intent for write-in candidates was January 31, 2022, and the Town did not received any affidavits of intent; and

WHEREAS, the election can be cancelled after the close of business, January 31, 2022, the sixty-fourth (64th) day prior to the election.

NOW, THEREFORE, BE IT RESOLVED BY THE BOARD OF TRUSTEES OF THE TOWN OF FOXFIELD, COLORADO, AS FOLLOWS:

Section 1. On January 31, 2022, because there are not more candidates than offices to be filled, including candidates filing affidavits of intent to be write-in candidates, the Town Clerk is hereby directed to cancel the April 5, 2022, regular election for the Town of Foxfield.

Section 2. The following person is hereby deemed elected to a four-year term as Ward 2 Trustee: David Goddard.

Section 3. The Town Clerk shall publish notice of such cancellation to inform the electors of the Town, and shall post notice of such cancellation on the Town website and at not less than one other public place in the Town.

PASSED ON FIRST AND FINAL READING THIS 17th day of February 2022.

BOARD OF TRUSTEES,
TOWN OF FOXFIELD, COLORADO

Lisa Jones, Mayor

RE: Municipal Judge Agreement Renewal

DISCUSSION:

Attached for Board consideration is the renewal Agreement for Kevin Sidel to remain as the Town of Foxfield Municipal Judge. There are no changes to the contract terms other than the date. The remuneration will remain at \$250/month.

RECOMMENDED MOTION:

"I move to extend the Agreement with the Municipal Judge for two years, until December 31, 2023.

ATTACHMENTS:

Exhibit A: Agreement for Municipal Judge

THIS AGREEMENT is made and entered into this _____ day of _____, 2022 by and between the Town of Foxfield, a Colorado statutory town (the "Town"), and KEVIN SIDEL ("Judge Sidel").

RECITAL
S:

A. The Board of Trustees has determined to re-appoint Judge Sidel as the Municipal Judge of the Town of Foxfield pursuant to C.R.S. § 13-10-105, and desires to set the salary of Judge Sidel pursuant to C.R.S. § 13-10-107.

B. Judge Sidel desires to accept the appointment as Municipal Judge, and the salary contained herein.

NOW, THEREFORE, it is hereby agreed that, for the consideration hereinafter set forth, Judge Sidel shall be re-appointed as Municipal Judge of the Town of Foxfield.

I.
TERM

Judge Sidel is hereby re-appointed for an additional two (2) year term, which ends on February 1, 2024.

II.
COMPENSATION

As set forth in Ordinance 03-2011, enacted pursuant to C.R.S. § 13-10-107, the annual salary for Judge Sidel shall be three thousand dollars (\$3,000.00) per year. The parties further agree to review the compensation stated herein at the end of the calendar year. In addition, in the event that Judge Sidel performs judicial services for the Foxfield municipal court in excess of twenty-four (24) hours during any calendar year in which this Agreement is in effect, such hours in excess of twenty-four (24) shall be compensated at a rate of Sixty-Five Dollars (\$65.00) per hour. In the event Judge Sidel is absent more than six percent (6%) of the scheduled municipal court sessions during any calendar year in which this Agreement is in effect, the Town may reduce the compensation described herein by the percentage of the municipal court sessions missed by Judge Sidel or terminate this Agreement for cause.

The Town and Judge Sidel agree to an annual review of the compensation set forth in this Agreement.

III. COMPLIANCE WITH
LAW

Nothing herein shall be deemed to create any additional terms, conditions or obligations of employment in addition to those provided for in Article 10 of Title 13 of the Colorado Revised Statutes, nor is anything herein intended to change the nature of the Municipal Judge as an appointed position under Article 10 of Title 13 of the Colorado Revised Statutes; rather, this Agreement is simply intended to memorialize the term and salary of the Municipal Judge as required by the applicable law.

IV. EFFECTIVE DATE

The effective date of this Agreement is February 1, 2022.

IN WITNESS WHEREOF, the parties hereto each herewith subscribe the same in duplicate, as of the date first above written.

RE: Draft Ordinance Adding a New Article 6 of Chapter 6 Regarding Marijuana Delivery Within the Town

DISCUSSION:

Attached for Board discussion is a draft Ordinance to add a new Article 6 to Chapter 6 of the Foxfield Municipal Code regarding marijuana delivery within the Town of Foxfield.

This Ordinance is simply to allow the service within the Town. The State would collect any sales tax as with any other business. The Clerk will set up the permitting process and renewing the permits will be no more difficult than annual renewal of business licenses.

Deputy Town Clerk Gallivan and Trustee Cockrell have researched the permitting process. The State has an in-depth process for issuing delivery permits, as do many larger municipalities. Per Town Attorney Hoffmann, all Foxfield would need is a simple, one-page permit application. As long as the applicant has both a State and at least one other municipality delivery permit, we would not need to do any further research to issue a delivery permit specific to Foxfield.

The applicant would complete the one-page application and submit it to Foxfield along with the fee set by the Board of Trustees. Staff recommends an annual fee of \$100 for this permit.

Exhibit A: Draft Ordinance 2022-01

Trustee Bill No.
Series of 2022
Town of Foxfield

Introduced by

**A BILL FOR AN ORDINANCE ADDING A NEW ARTICLE 6 OF CHAPTER 6
REGARDING MARIJUANA DELIVERY WITHIN THE TOWN**

NOW, THEREFORE, BE IT ORDAINED BY THE BOARD OF TRUSTEES OF
FOXFIELD, COLORADO:

Section 1. The Town of Foxfield Municipal Code is amended by the addition thereto of a
new Article 6 of Chapter 6 to read as follows:

ARTICLE 6

Marijuana Delivery

Sec. 6-6-10. Delivery of Medical Marijuana.

(a) The Board of Trustees hereby authorizes the Town Clerk to
administratively approve the issuance of a medical marijuana delivery permit to
any licensed medical marijuana business. The permitting procedure shall comply
with C.R.S. § 44-10-501(11).

(b) All deliveries made within the Town shall comply with C.R.S. § 44-
10-501(11) and 1 CCR 212-3.

(c) All medical marijuana and medical marijuana infused products
delivered to an address within the Town are subject to Town sales tax.

Sec. 6-6-20. Delivery of Retail Marijuana.

(a) The Board of Trustees hereby authorizes the Town Clerk to
administratively approve the issuance of a retail marijuana delivery permit to any
licensed retail marijuana store and licensed retail marijuana transporter. The
permitting procedure shall comply with C.R.S. § 44-10-601(13).

(b) All deliveries made within the Town shall comply with C.R.S. § 44-
10-601(13) and 1 CCR 212-3.

(c) All retail marijuana and retail marijuana infused products delivered
to an address within the Town are subject to Town sales tax.

Section 2. The Town Board of Trustees hereby finds, determines, and declares that this Ordinance is promulgated under the general police powers of the Town of Foxfield, that it is promulgated for the health, safety, and welfare of the public, and that this Ordinance is necessary for the preservation of health and safety and for the protection of public convenience and welfare.

Section 3. If any clause, sentence, paragraph, or part of this Ordinance or the application thereof to any person or circumstances shall for any reason be adjudged by a court of competent jurisdiction invalid, such judgment shall not affect application to other persons or circumstances.

Section 4. This ordinance shall become effective thirty (30) days after final publication.

Adopted as Ordinance No. 02 Series of 2022, by the Board of Trustees of Foxfield, Colorado, and signed and approved by its Mayor or presiding officers this _____ day of _____, 2022.

MEMORANDUM

TO: Mayor Jones and Members of the Board

FROM: Karen Proctor, Town Administrator

DATE: February 17, 2022

RE: American Rescue Plan (ARP) Funding

DISCUSSION:

On May 10, 2021, the U.S. Department of the Treasury announced the launch of the Coronavirus State and Local Fiscal Recovery Funds, established by the American Rescue Plan (ARP) Act of 2021. These funds provide \$350 billion in emergency funding for eligible state, local, territorial, and Tribal governments to help with their response to the COVID-19 emergency and its economic impacts.

The Town of Foxfield was allocated a total of \$196,555.51 of American Rescue Plan funds. These allocations will occur in two tranches of \$98,277.75 each. The Town received the first allocation on June 28, 2021, and the second tranche will be distributed no earlier than one year from the receipt of the first tranche. \$13,253 of these funds has been spent for the water infrastructure and remote meeting equipment (the OWL and a laptop), therefore approximately \$85,024 remains from the first tranche with the second tranche of \$98,277.75 to be received by June 28, 2022, for a total available of \$183,301.

The Treasury released a final rule on the use of the ARP funds on January 6, 2022. An overview on how these funds can be used to respond to acute pandemic response needs, fill revenue shortfalls among these governments, and support the communities and populations hardest-hit by the COVID-19 crisis is attached for your review.

The most significant change in the Final Rule is regarding using the funds based on revenue loss. The Final Rule allows recipients to use a standard allowance of up to \$10 million in aggregate, not to exceed their award amount, during the program to fund any "government services" (see page 9-11 in overview of Final Rule). Road maintenance is specifically listed as an allowed use.

The Board expressed an interest in providing grants to Foxfield small businesses (see pages 21-22 in overview of Final Rule) and asked staff to draft some possible parameters for these grants. Attached as Exhibit B are some draft parameters for discussion.

The following Foxfield business received a total of \$99,995 in CARES funds:

Foxfield Professional Dry Cleaners

Perry Nails

India's Kitchen III

Deer Lake Electric

Staff reached out to the Foxfield Village Center businesses to see if there was a need for further funding. At the time of this memo, two responses were received that indicated a need.

Would the Board like to:

- 1) Offer all the available funds to Foxfield businesses?
- 2) Offer a portion of the funds to Foxfield business and use a portion for government services?

Coronavirus State & Local Fiscal Recovery Funds: Overview of the Final Rule

U.S. DEPARTMENT OF THE TREASURY

January 2022

The Overview of the Final Rule provides a summary of major provisions of the final rule for informational purposes and is intended as a brief, simplified user guide to the final rule provisions.

The descriptions provided in this document summarize key provisions of the final rule but are non-exhaustive, do not describe all terms and conditions associated with the use of SLFRF, and do not describe all requirements that may apply to this funding. Any SLFRF funds received are also subject to the terms and conditions of the agreement entered into by Treasury and the respective jurisdiction, which incorporate the provisions of the final rule and the guidance that implements this program.

Introduction

The Coronavirus State and Local Fiscal Recovery Funds (SLFRF), a part of the American Rescue Plan, delivers \$350 billion to state, local, and Tribal governments across the country to support their response to and recovery from the COVID-19 public health emergency. The program ensures that governments have the resources needed to:

- Fight the pandemic and support families and businesses struggling with its public health and economic impacts,
- Maintain vital public services, even amid declines in revenue, and
- Build a strong, resilient, and equitable recovery by making investments that support long-term growth and opportunity.

EARLY PROGRAM IMPLEMENTATION

In May 2021, Treasury published the Interim final rule (IFR) describing eligible and ineligible uses of funds (as well as other program provisions), sought feedback from the public on these program rules, and began to distribute funds. The IFR went immediately into effect in May, and since then, governments have used SLFRF funds to meet their immediate pandemic response needs and begin building a strong and equitable recovery, such as through providing vaccine incentives, development of affordable housing, and construction of infrastructure to deliver safe and reliable water.

As governments began to deploy this funding in their communities, Treasury carefully considered the feedback provided through its public comment process and other forums. Treasury received over 1,500 comments, participated in hundreds of meetings, and received correspondence from a wide range of governments and other stakeholders.

KEY CHANGES AND CLARIFICATIONS IN THE FINAL RULE

The final rule delivers broader flexibility and greater simplicity in the program, responsive to feedback in the comment process. Among other clarifications and changes, the final rule provides the features below.

Replacing Lost Public Sector Revenue

The final rule offers a standard allowance for revenue loss of \$10 million, allowing recipients to select between a standard amount of revenue loss or complete a full revenue loss calculation. Recipients that select the standard allowance may use that amount – in many cases their full award – for government services, with streamlined reporting requirements.

Public Health and Economic Impacts

In addition to programs and services, the final rule clarifies that recipients can use funds for capital expenditures that support an eligible COVID-19 public health or economic response. For example, recipients may build certain affordable housing, childcare facilities, schools, hospitals, and other projects consistent with final rule requirements.

In addition, the final rule provides an expanded set of households and communities that are presumed to be “impacted” and “disproportionately impacted” by the pandemic, thereby allowing recipients to provide responses to a broad set of households and entities without requiring additional analysis. Further, the final rule provides a broader set of uses available for these communities as part of COVID-19 public health and economic response, including making affordable housing, childcare, early learning, and services to address learning loss during the pandemic eligible in all impacted communities and making certain community development and neighborhood revitalization activities eligible for disproportionately impacted communities.

Further, the final rule allows for a broader set of uses to restore and support government employment, including hiring above a recipient’s pre-pandemic baseline, providing funds to employees that experienced pay cuts or furloughs, avoiding layoffs, and providing retention incentives.

Premium Pay

The final rule delivers more streamlined options to provide premium pay, by broadening the share of eligible workers who can receive premium pay without a written justification while maintaining a focus on lower-income and frontline workers performing essential work.

Water, Sewer & Broadband Infrastructure

The final rule significantly broadens eligible broadband infrastructure investments to address challenges with broadband access, affordability, and reliability, and adds additional eligible water and sewer infrastructure investments, including a broader range of lead remediation and stormwater management projects.

FINAL RULE EFFECTIVE DATE

The final rule takes effect on April 1, 2022. Until that time, the interim final rule remains in effect; funds used consistently with the IFR while it is in effect are in compliance with the SLFRF program.

However, recipients can choose to take advantage of the final rule’s flexibilities and simplifications now, even ahead of the effective date. Treasury will not take action to enforce the interim final rule to the extent that a use of funds is consistent with the terms of the final rule, regardless of when the SLFRF funds were used. Recipients may consult the *Statement Regarding Compliance with the Coronavirus State and Local Fiscal Recovery Funds Interim Final Rule and Final Rule*, which can be found on Treasury’s website, for more information on compliance with the interim final rule and the final rule.

Overview of the Program

The Coronavirus State and Local Fiscal Recovery Funds (SLFRF) program provides substantial flexibility for each jurisdiction to meet local needs within the four separate eligible use categories. This Overview of the Final Rule addresses the four eligible use categories ordered from the broadest and most flexible to the most specific.

Recipients may use SLFRF funds to:

- **Replace lost public sector revenue**, using this funding to provide government services up to the amount of revenue loss due to the pandemic.
 - Recipients may determine their revenue loss by choosing between two options:
 - A standard allowance of up to \$10 million in aggregate, not to exceed their award amount, during the program;
 - Calculating their jurisdiction's specific revenue loss each year using Treasury's formula, which compares actual revenue to a counterfactual trend.
 - Recipients may use funds up to the amount of revenue loss for government services; generally, services traditionally provided by recipient governments are government services, unless Treasury has stated otherwise.
- **Support the COVID-19 public health and economic response** by addressing COVID-19 and its impact on public health as well as addressing economic harms to households, small businesses, nonprofits, impacted industries, and the public sector.
 - Recipients can use funds for programs, services, or capital expenditures that respond to the public health and negative economic impacts of the pandemic.
 - To provide simple and clear eligible uses of funds, Treasury provides a list of enumerated uses that recipients can provide to households, populations, or classes (i.e., groups) that experienced pandemic impacts.
 - Public health eligible uses include COVID-19 mitigation and prevention, medical expenses, behavioral healthcare, and preventing and responding to violence.
 - Eligible uses to respond to negative economic impacts are organized by the type of beneficiary: assistance to households, small businesses, and nonprofits.
 - Each category includes assistance for "impacted" and "disproportionately impacted" classes: impacted classes experienced the general, broad-based impacts of the pandemic, while disproportionately impacted classes faced meaningfully more severe impacts, often due to preexisting disparities.
 - To simplify administration, the final rule presumes that some populations and groups were impacted or disproportionately impacted and are eligible for responsive services.

- Eligible uses for assistance to impacted households include aid for re-employment, job training, food, rent, mortgages, utilities, affordable housing development, childcare, early education, addressing learning loss, and many more uses.
- Eligible uses for assistance to impacted small businesses or nonprofits include loans or grants to mitigate financial hardship, technical assistance for small businesses, and many more uses.
- Recipients can also provide assistance to impacted industries like travel, tourism, and hospitality that faced substantial pandemic impacts, or address impacts to the public sector, for example by re-hiring public sector workers cut during the crisis.
- Recipients providing funds for enumerated uses to populations and groups that Treasury has presumed eligible are clearly operating consistently with the final rule. Recipients can also identify (1) other populations or groups, beyond those presumed eligible, that experienced pandemic impacts or disproportionate impacts and (2) other programs, services, or capital expenditures, beyond those enumerated, to respond to those impacts.
- **Provide premium pay for eligible workers performing essential work**, offering additional support to those who have and will bear the greatest health risks because of their service in critical sectors.
 - Recipients may provide premium pay to eligible workers – generally those working in-person in key economic sectors – who are below a wage threshold or non-exempt from the Fair Labor Standards Act overtime provisions, or if the recipient submits justification that the premium pay is responsive to workers performing essential work.
- **Invest in water, sewer, and broadband infrastructure**, making necessary investments to improve access to clean drinking water, to support vital wastewater and stormwater infrastructure, and to expand affordable access to broadband internet.
 - Recipients may fund a broad range of water and sewer projects, including those eligible under the EPA’s Clean Water State Revolving Fund, EPA’s Drinking Water State Revolving Fund, and certain additional projects, including a wide set of lead remediation, stormwater infrastructure, and aid for private wells and septic units.
 - Recipients may fund high-speed broadband infrastructure in areas of need that the recipient identifies, such as areas without access to adequate speeds, affordable options, or where connections are inconsistent or unreliable; completed projects must participate in a low-income subsidy program.

While recipients have considerable flexibility to use funds to address the diverse needs of their communities, some restrictions on use apply across all eligible use categories. These include:

- **For states and territories:** No offsets of a reduction in net tax revenue resulting from a change in state or territory law.

Coronavirus State & Local Fiscal Recovery Funds: Overview of the Final Rule

- **For all recipients except for Tribal governments:** No extraordinary contributions to a pension fund for the purpose of reducing an accrued, unfunded liability.
- **For all recipients:** No payments for debt service and replenishments of rainy day funds; no satisfaction of settlements and judgments; no uses that contravene or violate the American Rescue Plan Act, Uniform Guidance conflicts of interest requirements, and other federal, state, and local laws and regulations.

Under the SLFRF program, funds must be used for costs incurred on or after March 3, 2021. Further, funds must be obligated by December 31, 2024, and expended by December 31, 2026. This time period, during which recipients can expend SLFRF funds, is the “period of performance.”

In addition to SLFRF, the American Rescue Plan includes other sources of funding for state and local governments, including the [Coronavirus Capital Projects Fund](#) to fund critical capital investments including broadband infrastructure; the [Homeowner Assistance Fund](#) to provide relief for our country’s most vulnerable homeowners; the [Emergency Rental Assistance Program](#) to assist households that are unable to pay rent or utilities; and the [State Small Business Credit Initiative](#) to fund small business credit expansion initiatives. Eligible recipients are encouraged to visit the Treasury website for more information.

Replacing Lost Public Sector Revenue

The Coronavirus State and Local Fiscal Recovery Funds provide needed fiscal relief for recipients that have experienced revenue loss due to the onset of the COVID-19 public health emergency. Specifically, SLFRF funding may be used to pay for “government services” in an amount equal to the revenue loss experienced by the recipient due to the COVID-19 public health emergency.

Government services generally include any service traditionally provided by a government, including construction of roads and other infrastructure, provision of public safety and other services, and health and educational services. Funds spent under government services are subject to streamlined reporting and compliance requirements.

In order to use funds under government services, recipients should first determine revenue loss. They may, then, spend up to that amount on general government services.

DETERMINING REVENUE LOSS

Recipients have two options for how to determine their amount of revenue loss. Recipients must choose one of the two options and cannot switch between these approaches after an election is made.

- 1. Recipients may elect a “standard allowance” of \$10 million to spend on government services through the period of performance.**

Under this option, which is newly offered in the final rule Treasury presumes that up to \$10 million in revenue has been lost due to the public health emergency and recipients are permitted to use that amount (not to exceed the award amount) to fund “government services.” The standard allowance provides an estimate of revenue loss that is based on an extensive analysis of average revenue loss across states and localities, and offers a simple, convenient way to determine revenue loss, particularly for SLFRF’s smallest recipients.

All recipients may elect to use this standard allowance instead of calculating lost revenue using the formula below, including those with total allocations of \$10 million or less. Electing the standard allowance does not increase or decrease a recipient’s total allocation.

- 2. Recipients may calculate their actual revenue loss according to the formula articulated in the final rule.**

Under this option, recipients calculate revenue loss at four distinct points in time, either at the end of each calendar year (e.g., December 31 for years 2020, 2021, 2022, and 2023) or the end of each fiscal year of the recipient. Under the flexibility provided in the final rule, recipients can choose whether to use calendar or fiscal year dates but must be consistent throughout the period of performance. Treasury has also provided several adjustments to the definition of general revenue in the final rule.

To calculate revenue loss at each of these dates, recipients must follow a four-step process:

- a. Calculate revenues collected in the most recent full fiscal year prior to the public health emergency (i.e., last full fiscal year before January 27, 2020), called the *base year revenue*.
- b. Estimate *counterfactual revenue*, which is equal to the following formula, where n is the number of months elapsed since the end of the base year to the calculation date:

$$\text{base year revenue} \times (1 + \text{growth adjustment})^{\frac{n}{12}}$$

The *growth adjustment* is the greater of either a standard growth rate—5.2 percent—or the recipient’s average annual revenue growth in the last full three fiscal years prior to the COVID-19 public health emergency.

- c. Identify *actual revenue*, which equals revenues collected over the twelve months immediately preceding the calculation date.

Under the final rule, recipients must adjust actual revenue totals for the effect of tax cuts and tax increases that are adopted after the date of adoption of the final rule (January 6, 2022). Specifically, the estimated fiscal impact of tax cuts and tax increases adopted after January 6, 2022, must be added or subtracted to the calculation of actual revenue for purposes of calculation dates that occur on or after April 1, 2022.

Recipients may subtract from their calculation of actual revenue the effect of tax increases enacted prior to the adoption of the final rule. Note that recipients that elect to remove the effect of tax increases enacted before the adoption of the final rule must also remove the effect of tax decreases enacted before the adoption of the final rule, such that they are accurately removing the effect of tax policy changes on revenue.

- d. Revenue loss for the calculation date is equal to *counterfactual revenue* minus *actual revenue* (adjusted for tax changes) for the twelve-month period. If actual revenue exceeds counterfactual revenue, the loss is set to zero for that twelve-month period. Revenue loss for the period of performance is the sum of the revenue loss on for each calculation date.

The supplementary information in the final rule provides an example of this calculation, which recipients may find helpful, in the Revenue Loss section.

SPENDING ON GOVERNMENT SERVICES

Recipients can use SLFRF funds on government services up to the revenue loss amount, whether that be the standard allowance amount or the amount calculated using the above approach. **Government services generally include *any service traditionally provided by a government***, unless Treasury has stated otherwise. Here are some common examples, although this list is not exhaustive:

- ✓ Construction of schools and hospitals
- ✓ Road building and maintenance, and other infrastructure
- ✓ Health services
- ✓ General government administration, staff, and administrative facilities
- ✓ Environmental remediation
- ✓ Provision of police, fire, and other public safety services (including purchase of fire trucks and police vehicles)

Government services is the most flexible eligible use category under the SLFRF program, and funds are subject to streamlined reporting and compliance requirements. Recipients should be mindful that certain restrictions, which are detailed further in the Restrictions on Use section and apply to all uses of funds, apply to government services as well.

Responding to Public Health and Economic Impacts of COVID-19

The Coronavirus State and Local Fiscal Recovery Funds provide resources for governments to meet the public health and economic needs of those impacted by the pandemic in their communities, as well as address longstanding health and economic disparities, which amplified the impact of the pandemic in disproportionately impacted communities, resulting in more severe pandemic impacts.

The eligible use category to respond to public health and negative economic impacts is organized around the types of assistance a recipient may provide and includes several sub-categories:

- public health,
- assistance to households,
- assistance to small businesses,
- assistance to nonprofits,
- aid to impacted industries, and
- public sector capacity.

In general, to identify eligible uses of funds in this category, recipients should (1) identify a COVID-19 public health or economic impact on an individual or class (i.e., a group) and (2) design a program that responds to that impact. Responses should be related and reasonably proportional to the harm identified and reasonably designed to benefit those impacted.

To provide simple, clear eligible uses of funds that meet this standard, Treasury provides a non-exhaustive list of enumerated uses that respond to pandemic impacts. Treasury also presumes that some populations experienced pandemic impacts and are eligible for responsive services. In other words, recipients providing enumerated uses of funds to populations presumed eligible are clearly operating consistently with the final rule.¹

Recipients also have broad flexibility to (1) identify and respond to other pandemic impacts and (2) serve other populations that experienced pandemic impacts, beyond the enumerated uses and presumed eligible populations. Recipients can also identify groups or “classes” of beneficiaries that experienced pandemic impacts and provide services to those classes.

¹ However, please note that use of funds for enumerated uses may not be grossly disproportionate to the harm. Further, recipients should consult the Capital Expenditures section for more information about pursuing a capital expenditure; please note that enumerated capital expenditures are not presumed to be reasonably proportional responses to an identified harm except as provided in the Capital Expenditures section.

| Step | 1. Identify COVID-19 public health or economic impact | 2. Design a response that addresses or responds to the impact |
|---------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Analysis | <ul style="list-style-type: none"> Can identify impact to a specific household, business or nonprofit or to a class of households, businesses, or nonprofits (i.e., group) Can also identify disproportionate impacts, or more severe impacts, to a specific beneficiary or to a class | <ul style="list-style-type: none"> Types of responses can include a program, service, or capital expenditure Response should be related and reasonably proportional to the harm Response should also be reasonably designed to benefit impacted individual or class |
| Simplifying Presumptions | <ul style="list-style-type: none"> Final Rule presumes certain populations and classes are impacted and disproportionately impacted | <ul style="list-style-type: none"> Final Rule provides non-exhaustive list of enumerated eligible uses that respond to pandemic impacts and disproportionate impacts |

To assess eligibility of uses of funds, recipients should first determine the sub-category where their use of funds may fit (e.g., public health, assistance to households, assistance to small businesses), based on the entity that experienced the health or economic impact.² Then, recipients should refer to the relevant section for more details on each sub-category.

While the same overall eligibility standard applies to all uses of funds to respond to the public health and negative economic impacts of the pandemic, each sub-category has specific nuances on its application. In addition:

- Recipients interested in using funds for capital expenditures (i.e., investments in property, facilities, or equipment) should review the Capital Expenditures section in addition to the eligible use sub-category.
- Recipients interested in other uses of funds, beyond the enumerated uses, should refer to the section on “Framework for Eligible Uses Beyond Those Enumerated.”

² For example, a recipient interested in providing aid to unemployed individuals is addressing a negative economic impact experienced by a household and should refer to the section on assistance to households. Recipients should also be aware of the difference between “beneficiaries” and “sub-recipients.” Beneficiaries are households, small businesses, or nonprofits that can receive assistance based on impacts of the pandemic that they experienced. On the other hand, sub-recipients are organizations that carry out eligible uses on behalf of a government, often through grants or contracts. Sub-recipients do not need to have experienced a negative economic impact of the pandemic; rather, they are providing services to beneficiaries that experienced an impact.

RESPONDING TO THE PUBLIC HEALTH EMERGENCY

While the country has made tremendous progress in the fight against COVID-19, including a historic vaccination campaign, the disease still poses a grave threat to Americans' health and the economy. Providing state, local, and Tribal governments the resources needed to fight the COVID-19 pandemic is a core goal of the Coronavirus State and Local Fiscal Recovery Funds, as well as addressing the other ways that the pandemic has impacted public health. Treasury has identified several public health impacts of the pandemic and enumerated uses of funds to respond to impacted populations.

- **COVID-19 mitigation and prevention.** The pandemic has broadly impacted Americans and recipients can provide services to prevent and mitigate COVID-19 to the general public or to small businesses, nonprofits, and impacted industries in general. Enumerated eligible uses include:
 - ✓ Vaccination programs, including vaccine incentives and vaccine sites
 - ✓ Testing programs, equipment and sites
 - ✓ Monitoring, contact tracing & public health surveillance (e.g., monitoring for variants)
 - ✓ Public communication efforts
 - ✓ Public health data systems
 - ✓ COVID-19 prevention and treatment equipment, such as ventilators and ambulances
 - ✓ Medical and PPE/protective supplies
 - ✓ Support for isolation or quarantine
 - ✓ Ventilation system installation and improvement
 - ✓ Technical assistance on mitigation of COVID-19 threats to public health and safety
 - ✓ Transportation to reach vaccination or testing sites, or other prevention and mitigation services for vulnerable populations
 - ✓ Support for prevention, mitigation, or other services in congregate living facilities, public facilities, and schools
 - ✓ Support for prevention and mitigation strategies in small businesses, nonprofits, and impacted industries
 - ✓ Medical facilities generally dedicated to COVID-19 treatment and mitigation (e.g., ICUs, emergency rooms)
 - ✓ Temporary medical facilities and other measures to increase COVID-19 treatment capacity
 - ✓ Emergency operations centers & emergency response equipment (e.g., emergency response radio systems)
 - ✓ Public telemedicine capabilities for COVID-19 related treatment

- **Medical expenses.** Funds may be used for expenses to households, medical providers, or others that incurred medical costs due to the pandemic, including:
 - ✓ Unreimbursed expenses for medical care for COVID-19 testing or treatment, such as uncompensated care costs for medical providers or out-of-pocket costs for individuals
 - ✓ Paid family and medical leave for public employees to enable compliance with COVID-19 public health precautions
 - ✓ Emergency medical response expenses
 - ✓ Treatment of long-term symptoms or effects of COVID-19
- **Behavioral health care, such as mental health treatment, substance use treatment, and other behavioral health services.** Treasury recognizes that the pandemic has broadly impacted Americans' behavioral health and recipients can provide these services to the general public to respond. Enumerated eligible uses include:
 - ✓ Prevention, outpatient treatment, inpatient treatment, crisis care, diversion programs, outreach to individuals not yet engaged in treatment, harm reduction & long-term recovery support
 - ✓ Enhanced behavioral health services in schools
 - ✓ Services for pregnant women or infants born with neonatal abstinence syndrome
 - ✓ Support for equitable access to reduce disparities in access to high-quality treatment
 - ✓ Peer support groups, costs for residence in supportive housing or recovery housing, and the 988 National Suicide Prevention Lifeline or other hotline services
 - ✓ Expansion of access to evidence-based services for opioid use disorder prevention, treatment, harm reduction, and recovery
 - ✓ Behavioral health facilities & equipment
- **Preventing and responding to violence.** Recognizing that violence – and especially gun violence – has increased in some communities due to the pandemic, recipients may use funds to respond in these communities through:
 - ✓ Referrals to trauma recovery services for victims of crime
 - ✓ Community violence intervention programs, including:
 - Evidence-based practices like focused deterrence, with wraparound services such as behavioral therapy, trauma recovery, job training, education, housing and relocation services, and financial assistance
 - ✓ In communities experiencing increased gun violence due to the pandemic:
 - Law enforcement officers focused on advancing community policing
 - Enforcement efforts to reduce gun violence, including prosecution
 - Technology & equipment to support law enforcement response

RESPONDING TO NEGATIVE ECONOMIC IMPACTS

The pandemic caused severe economic damage and, while the economy is on track to a strong recovery, much work remains to continue building a robust, resilient, and equitable economy in the wake of the crisis and to ensure that the benefits of this recovery reach all Americans. While the pandemic impacted millions of American households and businesses, some of its most severe impacts fell on low-income and underserved communities, where pre-existing disparities amplified the impact of the pandemic and where the most work remains to reach a full recovery.

The final rule recognizes that the pandemic caused broad-based impacts that affected many communities, households, and small businesses across the country; for example, many workers faced unemployment and many small businesses saw declines in revenue. The final rule describes these as “impacted” households, communities, small businesses, and nonprofits.

At the same time, the pandemic caused disproportionate impacts, or more severe impacts, in certain communities. For example, low-income and underserved communities have faced more severe health and economic outcomes like higher rates of COVID-19 mortality and unemployment, often because pre-existing disparities exacerbated the impact of the pandemic. The final rule describes these as “disproportionately impacted” households, communities, small businesses, and nonprofits.

To simplify administration of the program, the final rule presumes that certain populations were “impacted” and “disproportionately impacted” by the pandemic; these populations are presumed to be eligible for services that respond to the impact they experienced. The final rule also enumerates a non-exhaustive list of eligible uses that are recognized as responsive to the impacts or disproportionate impacts of COVID-19. Recipients providing enumerated uses to populations presumed eligible are clearly operating consistently with the final rule.

As discussed further in the section Framework for Eligible Uses Beyond Those Enumerated, recipients can also identify other pandemic impacts, impacted or disproportionately impacted populations or classes, and responses.

Assistance to Households

Impacted Households and Communities

Treasury presumes the following households and communities are impacted by the pandemic:

- ✓ Low- or-moderate income households or communities
- ✓ Households that experienced unemployment
- ✓ Households that experienced increased food or housing insecurity
- ✓ Households that qualify for the Children's Health Insurance Program, Childcare Subsidies through the Child Care Development Fund (CCDF) Program, or Medicaid
- ✓ *When providing affordable housing programs:* households that qualify for the National Housing Trust Fund and Home Investment Partnerships Program
- ✓ *When providing services to address lost instructional time in K-12 schools:* any student that lost access to in-person instruction for a significant period of time

Low- or moderate-income households and communities are those with (i) income at or below 300 percent of the Federal Poverty Guidelines for the size of the household based on the most recently published poverty guidelines or (ii) income at or below 65 percent of the area median income for the county and size of household based on the most recently published data. For the vast majority of communities, the Federal Poverty Guidelines are higher than the area's median income and using the Federal Poverty Guidelines would result in more households and communities being presumed eligible. Treasury has provided an easy-to-use spreadsheet with Federal Poverty Guidelines and area median income levels on its website.

Recipients can measure income for a specific household or the median income for the community, depending on whether the response they plan to provide serves specific households or the general community. The income thresholds vary by household size; recipients should generally use income thresholds for the appropriate household size but can use a default household size of three when easier for administration or when measuring income for a general community.

The income limit for 300 percent of the Federal Poverty Guidelines for a household of three is \$65,880 per year.³ In other words, recipients can always presume that a household earning below this level, or a community with median income below this level, is impacted by the pandemic and eligible for services to respond. Additionally, by following the steps detailed in the section Framework for Eligible Uses Beyond Those Enumerated, recipients may designate additional households as impacted or disproportionately impacted beyond these presumptions, and may also pursue projects not listed below in response to these impacts consistent with Treasury's standards.

³ For recipients in Alaska, the income limit for 300 percent of the Federal Poverty Guidelines for a household of three is \$82,350 per year. For recipients in Hawaii, the income limit for 300 percent of the Federal Poverty Guidelines for a household of three is \$75,780 per year.

Treasury recognizes the enumerated projects below, which have been expanded under the final rule, as eligible to respond to impacts of the pandemic on households and communities:

- ✓ Food assistance & food banks
- ✓ Emergency housing assistance: rental assistance, mortgage assistance, utility assistance, assistance paying delinquent property taxes, counseling and legal aid to prevent eviction and homelessness & emergency programs or services for homeless individuals, including temporary residences for people experiencing homelessness
- ✓ Health insurance coverage expansion
- ✓ Benefits for surviving family members of individuals who have died from COVID-19
- ✓ Assistance to individuals who want and are available for work, including job training, public jobs programs and fairs, support for childcare and transportation to and from a jobsite or interview, incentives for newly-employed workers, subsidized employment, grants to hire underserved workers, assistance to unemployed individuals to start small businesses & development of job and workforce training centers
- ✓ Financial services for the unbanked and underbanked
- ✓ Burials, home repair & home weatherization
- ✓ Programs, devices & equipment for internet access and digital literacy, including subsidies for costs of access
- ✓ Cash assistance
- ✓ Paid sick, medical, and family leave programs
- ✓ Assistance in accessing and applying for public benefits or services
- ✓ Childcare and early learning services, home visiting programs, services for child welfare-involved families and foster youth & childcare facilities
- ✓ Assistance to address the impact of learning loss for K-12 students (e.g., high-quality tutoring, differentiated instruction)
- ✓ Programs or services to support long-term housing security: including development of affordable housing and permanent supportive housing
- ✓ Certain contributions to an Unemployment Insurance Trust Fund⁴

⁴ Recipients may only use SLFRF funds for contributions to unemployment insurance trust funds and repayment of the principal amount due on advances received under Title XII of the Social Security Act up to an amount equal to (i) the difference between the balance in the recipient's unemployment insurance trust fund as of January 27, 2020 and the balance of such account as of May 17, 2021, plus (ii) the principal amount outstanding as of May 17, 2021 on any advances received under Title XII of the Social Security Act between January 27, 2020 and May 17, 2021. Further, recipients may use SLFRF funds for the payment of any interest due on such Title XII advances. Additionally, a recipient that deposits SLFRF funds into its unemployment insurance trust fund to fully restore the pre-pandemic balance may not draw down that balance and deposit more SLFRF funds, back up to the pre-pandemic balance. Recipients that deposit SLFRF funds into an unemployment insurance trust fund, or use SLFRF funds to repay principal on Title XII advances, may not take action to reduce benefits available to unemployed workers by changing the computation method governing regular unemployment compensation in a way that results in a reduction of average weekly benefit amounts or the number of weeks of benefits payable (i.e., maximum benefit entitlement).

Disproportionately Impacted Households and Communities

Treasury presumes the following households and communities are disproportionately impacted by the pandemic:

- ✓ Low -income households and communities
- ✓ Households residing in Qualified Census Tracts
- ✓ Households that qualify for certain federal benefits⁵
- ✓ Households receiving services provided by Tribal governments
- ✓ Households residing in the U.S. territories or receiving services from these governments

Low-income households and communities are those with (i) income at or below 185 percent of the Federal Poverty Guidelines for the size of its household based on the most recently published poverty guidelines or (ii) income at or below 40 percent of area median income for its county and size of household based on the most recently published data. For the vast majority of communities, the Federal Poverty Guidelines level is higher than the area median income level and using this level would result in more households and communities being presumed eligible. Treasury has provided an easy-to-use spreadsheet with Federal Poverty Guidelines and area median income levels on its website.

Recipients can measure income for a specific household or the median income for the community, depending on whether the service they plan to provide serves specific households or the general community. The income thresholds vary by household size; recipients should generally use income thresholds for the appropriate household size but can use a default household size of three when easier for administration or when measuring income for a general community.

The income limit for 185 percent of the Federal Poverty Guidelines for a household of three is \$40,626 per year.⁶ In other words, recipients can always presume that a household earning below this level, or a community with median income below this level, is disproportionately impacted by the pandemic and eligible for services to respond.

⁵ These programs are Temporary Assistance for Needy Families (TANF), Supplemental Nutrition Assistance Program (SNAP), Free- and Reduced-Price Lunch (NSLP) and/or School Breakfast (SBP) programs, Medicare Part D Low-Income Subsidies, Supplemental Security Income (SSI), Head Start and/or Early Head Start, Special Supplemental Nutrition Program for Women, Infants, and Children (WIC), Section 8 Vouchers, Low-Income Home Energy Assistance Program (LIHEAP), and Pell Grants. For services to address educational disparities, Treasury will recognize Title I eligible schools as disproportionately impacted and responsive services that support the school generally or support the whole school as eligible.

⁶ For recipients in Alaska, the income limit for 185 percent of the Federal Poverty Guidelines for a household of three is \$50,783 per year. For recipients in Hawaii, the income limit for 185 percent of the Federal Poverty Guidelines for a household of three is \$46,731 per year

Treasury recognizes the enumerated projects below, which have been expanded under the final rule, as eligible to respond to disproportionate impacts of the pandemic on households and communities:

- ✓ Pay for community health workers to help households access health & social services
- ✓ Remediation of lead paint or other lead hazards
- ✓ Primary care clinics, hospitals, integration of health services into other settings, and other investments in medical equipment & facilities designed to address health disparities
- ✓ Housing vouchers & assistance relocating to neighborhoods with higher economic opportunity
- ✓ Investments in neighborhoods to promote improved health outcomes
- ✓ Improvements to vacant and abandoned properties, including rehabilitation or maintenance, renovation, removal and remediation of environmental contaminants, demolition or deconstruction, greening/vacant lot cleanup & conversion to affordable housing⁷
- ✓ Services to address educational disparities, including assistance to high-poverty school districts & educational and evidence-based services to address student academic, social, emotional, and mental health needs
- ✓ Schools and other educational equipment & facilities

⁷ Please see the final rule for further details and conditions applicable to this eligible use. This includes Treasury's presumption that demolition of vacant or abandoned residential properties that results in a net reduction in occupiable housing units for low- and moderate-income individuals in an area where the availability of such housing is lower than the need for such housing is ineligible for support with SLFRF funds.

Assistance to Small Businesses

Small businesses have faced widespread challenges due to the pandemic, including periods of shutdown, declines in revenue, or increased costs. The final rule provides many tools for recipients to respond to the impacts of the pandemic on small businesses, or disproportionate impacts on businesses where pre-existing disparities like lack of access to capital compounded the pandemic's effects.

Small businesses eligible for assistance are those that experienced negative economic impacts or disproportionate impacts of the pandemic and meet the definition of "small business," specifically:

1. Have no more than 500 employees, or if applicable, the size standard in number of employees [established](#) by the Administrator of the Small Business Administration for the industry in which the business concern or organization operates, and
2. Are a small business concern as defined in section 3 of the Small Business Act⁸ (which includes, among other requirements, that the business is independently owned and operated and is not dominant in its field of operation).

Impacted Small Businesses

Recipients can identify small businesses impacted by the pandemic, and measures to respond, in many ways; for example, recipients could consider:

- | | |
|---------------------------------------|----------------------------------------------------------------------------|
| ✓ Decreased revenue or gross receipts | ✓ Capacity to weather financial hardship |
| ✓ Financial insecurity | ✓ Challenges covering payroll, rent or mortgage, and other operating costs |
| ✓ Increased costs | |

Assistance to small businesses that experienced negative economic impacts includes the following enumerated uses:

- | | |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------|
| ✓ Loans or grants to mitigate financial hardship, such as by supporting payroll and benefits, costs to retain employees, and mortgage, rent, utility, and other operating costs | ✓ Technical assistance, counseling, or other services to support business planning |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------|

Disproportionately Impacted Small Businesses

Treasury presumes that the following small businesses are disproportionately impacted by the pandemic:

⁸ 15 U.S.C. 632.

- ✓ Small businesses operating in Qualified Census Tracts
- ✓ Small businesses operated by Tribal governments or on Tribal lands
- ✓ Small businesses operating in the U.S. territories

Assistance to disproportionately impacted small businesses includes the following enumerated uses, which have been expanded under the final rule:

- ✓ Rehabilitation of commercial properties, storefront improvements & façade improvements
- ✓ Technical assistance, business incubators & grants for start-up or expansion costs for small businesses
- ✓ Support for microbusinesses, including financial, childcare, and transportation costs

Assistance to Nonprofits

Nonprofits have faced significant challenges due to the pandemic's increased demand for services and changing operational needs, as well as declines in revenue sources such as donations and fees.

Nonprofits eligible for assistance are those that experienced negative economic impacts or disproportionate impacts of the pandemic and meet the definition of "nonprofit"—specifically those that are 501(c)(3) or 501(c)(19) tax-exempt organizations.

Impacted Nonprofits

Recipients can identify nonprofits impacted by the pandemic, and measures to respond, in many ways; for example, recipients could consider:

- ✓ Decreased revenue (e.g., from donations and fees)
- ✓ Financial insecurity
- ✓ Increased costs (e.g., uncompensated increases in service need)
- ✓ Capacity to weather financial hardship
- ✓ Challenges covering payroll, rent or mortgage, and other operating costs

Assistance to nonprofits that experienced negative economic impacts includes the following enumerated uses:

- ✓ Loans or grants to mitigate financial hardship
- ✓ Technical or in-kind assistance or other services that mitigate negative economic impacts of the pandemic

Disproportionately Impacted Nonprofits

Treasury presumes that the following nonprofits are disproportionately impacted by the pandemic:

- ✓ Nonprofits operating in Qualified Census Tracts
- ✓ Nonprofits operated by Tribal governments or on Tribal lands
- ✓ Nonprofits operating in the U.S. territories

Recipients may identify appropriate responses that are related and reasonably proportional to addressing these disproportionate impacts.

Aid to Impacted Industries

Recipients may use SLFRF funding to provide aid to industries impacted by the COVID-19 pandemic. Recipients should first designate an impacted industry and then provide aid to address the impacted industry's negative economic impact.

This sub-category of eligible uses does not separately identify disproportionate impacts and corresponding responsive services.

1. Designating an impacted industry. There are two main ways an industry can be designated as "impacted."

1. If the industry is in the travel, tourism, or hospitality sectors (including Tribal development districts), the industry is impacted.
2. If the industry is outside the travel, tourism, or hospitality sectors, the industry is impacted if:
 - a. The industry experienced at least 8 percent employment loss from pre-pandemic levels,⁹ or
 - b. The industry is experiencing comparable or worse economic impacts as the national tourism, travel, and hospitality industries as of the date of the final rule, based on the totality of economic indicators or qualitative data (if quantitative data is unavailable), and if the impacts were generally due to the COVID-19 public health emergency.

Recipients have flexibility to define industries broadly or narrowly, but Treasury encourages recipients to define narrow and discrete industries eligible for aid. State and territory recipients also have flexibility to define the industries with greater geographic precision; for example, a state may identify a particular industry in a certain region of a state as impacted.

2. Providing eligible aid to the impacted industry. Aid may only be provided to support businesses, attractions, and Tribal development districts operating prior to the pandemic and affected by required closures and other efforts to contain the pandemic. Further, aid should be generally broadly available to all businesses within the impacted industry to avoid potential conflicts of interest, and Treasury encourages aid to be first used for operational expenses, such as payroll, before being used on other types of costs.

⁹ Specifically, a recipient should compare the percent change in the number of employees of the recipient's identified industry and the national Leisure & Hospitality sector in the three months before the pandemic's most severe impacts began (a straight three-month average of seasonally-adjusted employment data from December 2019, January 2020, and February 2020) with the latest data as of the final rule (a straight three-month average of seasonally-adjusted employment data from September 2021, October 2021, and November 2021). For parity and simplicity, smaller recipients without employment data that measure industries in their specific jurisdiction may use data available for a broader unit of government for this calculation (e.g., a county may use data from the state in which it is located; a city may use data for the county, if available, or state in which it is located) solely for purposes of determining whether a particular industry is an impacted industry.

U.S. DEPARTMENT OF THE TREASURY

Treasury recognizes the enumerated projects below as eligible responses to impacted industries.

- ✓ Aid to mitigate financial hardship, such as supporting payroll costs, lost pay and benefits for returning employees, support of operations and maintenance of existing equipment and facilities
- ✓ Technical assistance, counseling, or other services to support business planning
- ✓ COVID-19 mitigation and infection prevention measures (see section Public Health)

As with all eligible uses, recipients may pursue a project not listed above by undergoing the steps outlined in the section Framework for Eligible Uses Beyond Those Enumerated.

PUBLIC SECTOR CAPACITY

Recipients may use SLFRF funding to restore and bolster public sector capacity, which supports government's ability to deliver critical COVID-19 services. There are three main categories of eligible uses to bolster public sector capacity and workforce: Public Safety, Public Health, and Human Services Staff; Government Employment and Rehiring Public Sector Staff; and Effective Service Delivery.

Public Safety, Public Health, and Human Services Staff

SLFRF funding may be used for payroll and covered benefits for public safety, public health, health care, human services and similar employees of a recipient government, for the portion of the employee's time spent responding to COVID-19. Recipients should follow the steps below.

1. **Identify eligible public safety, public health, and human services staff.** Public safety staff include:

- ✓ Police officers (including state police officers)
- ✓ Sheriffs and deputy sheriffs
- ✓ Firefighters
- ✓ Emergency medical responders
- ✓ Correctional and detention officers
- ✓ Dispatchers and supervisor personnel that directly support public safety staff

Public health staff include:

- ✓ Employees involved in providing medical and other physical or mental health services to patients and supervisory personnel, including medical staff assigned to schools, prisons, and other such institutions
- ✓ Laboratory technicians, medical examiners, morgue staff, and other support services essential for patient care
- ✓ Employees of public health departments directly engaged in public health matters and related supervisory personnel

Human services staff include:

- ✓ Employees providing or administering social services and public benefits
- ✓ Child welfare services employees
- ✓ Child, elder, or family care employees

2. **Assess portion of time spent on COVID-19 response for eligible staff.**

Recipients can use a variety of methods to assess the share of an employees' time spent responding to COVID-19, including using reasonable estimates—such as estimating the share of time based on discussions with staff and applying that share to all employees in that position.

For administrative convenience, recipients can consider public health and safety employees entirely devoted to responding to COVID-19 (and their payroll and benefits fully covered by SLFRF) if the

employee, or his or her operating unit or division, is “primarily dedicated” to responding to COVID-19. Primarily dedicated means that more than half of the employee, unit, or division’s time is dedicated to responding to COVID-19.

Recipients must periodically reassess their determination and maintain records to support their assessment, although recipients do not need to track staff hours.

3. **Use SLFRF funding for payroll and covered benefits for the portion of eligible staff time spent on COVID-19 response.** SLFRF funding may be used for payroll and covered benefits for the portion of the employees’ time spent on COVID-19 response, as calculated above, through the period of performance.

Government Employment and Rehiring Public Sector Staff

Under the increased flexibility of the final rule, SLFRF funding may be used to support a broader set of uses to restore and support public sector employment. Eligible uses include hiring up to a pre-pandemic baseline that is adjusted for historic underinvestment in the public sector, providing additional funds for employees who experienced pay cuts or were furloughed, avoiding layoffs, providing worker retention incentives, and paying for ancillary administrative costs related to hiring, support, and retention.

- **Restoring pre-pandemic employment.** Recipients have two options to restore pre-pandemic employment, depending on the recipient’s needs.
 - *If the recipient simply wants to hire back employees for pre-pandemic positions:* Recipients may use SLFRF funds to hire employees for the same positions that existed on January 27, 2020 but that were unfilled or eliminated as of March 3, 2021. Recipients may use SLFRF funds to cover payroll and covered benefits for such positions through the period of performance.
 - *If the recipient wants to hire above the pre-pandemic baseline and/or would like to have flexibility in positions:* Recipients may use SLFRF funds to pay for payroll and covered benefits associated with the recipient increasing its number of budgeted FTEs up to 7.5 percent above its pre-pandemic baseline. Specifically, recipients should undergo the following steps:
 - a. Identify the recipient’s budgeted FTE level on January 27, 2020. This includes all budgeted positions, filled and unfilled. This is called the *pre-pandemic baseline*.
 - b. Multiply the pre-pandemic baseline by 1.075. This is called the *adjusted pre-pandemic baseline*.
 - c. Identify the recipient’s budgeted FTE level on March 3, 2021, which is the beginning of the period of performance for SLFRF funds. Recipients may, but are not required to, exclude the number of FTEs dedicated to responding to the COVID-19 public health emergency. This is called the *actual number of FTEs*.
 - d. Subtract the *actual number of FTEs* from the *adjusted pre-pandemic baseline* to calculate the number of FTEs that can be covered by SLFRF funds. Recipients do not have to hire for the same roles that existed pre-pandemic.

Coronavirus State & Local Fiscal Recovery Funds: Overview of the Final Rule

Recipients may use SLFRF funds to cover payroll and covered benefits through the period of performance; these employees must have begun their employment on or after March 3, 2021. Recipients may only use SLFRF funds for additional FTEs hired over the March 3, 2021 level (i.e., the *actual number of FTEs*).

- **Supporting and retaining public sector workers.** Recipients can also use funds in other ways that support the public sector workforce.¹⁰ These include:
 - **Providing additional funding for employees who experienced pay reductions or were furloughed** since the onset of the pandemic, up to the difference in the employee's pay, taking into account unemployment benefits received.
 - **Maintaining current compensation levels to prevent layoffs.** SLFRF funds may be used to maintain current compensation levels, with adjustments for inflation, in order to prevent layoffs that would otherwise be necessary.
 - **Providing worker retention incentives, including reasonable increases in compensation** to persuade employees to remain with the employer as compared to other employment options. Retention incentives must be entirely additive to an employee's regular compensation, narrowly tailored to need, and should not exceed incentives traditionally offered by the recipient or compensation that alternative employers may offer to compete for the employees. Treasury presumes that retention incentives that are less than 25 percent of the rate of base pay for an individual employee or 10 percent for a group or category of employees are reasonably proportional to the need to retain employees, as long as other requirements are met.
- **Covering administrative costs associated with administering the hiring, support, and retention programs above.**

Effective Service Delivery

SLFRF funding may be used to improve the efficacy of public health and economic programs through tools like program evaluation, data, and outreach, as well as to address administrative needs caused or exacerbated by the pandemic. Eligible uses include:

- **Supporting program evaluation, data, and outreach through:**

¹⁰ Recipients should be able to substantiate that these uses of funds are substantially due to the public health emergency or its negative economic impacts (e.g., fiscal pressures on state and local budgets) and respond to its impacts. See the final rule for details on these uses.

U.S. DEPARTMENT OF THE TREASURY

- ✓ Program evaluation and evidence resources
 - ✓ Data analysis resources to gather, assess, share, and use data
 - ✓ Technology infrastructure to improve access to and the user experience of government IT systems, as well as technology improvements to increase public access and delivery of government programs and services
 - ✓ Community outreach and engagement activities
 - ✓ Capacity building resources to support using data and evidence, including hiring staff, consultants, or technical assistance support
- **Addressing administrative needs, including:**
 - ✓ Administrative costs for programs responding to the public health emergency and its economic impacts, including non-SLFRF and non-federally funded programs
 - ✓ Address administrative needs caused or exacerbated by the pandemic, including addressing backlogs caused by shutdowns, increased repair or maintenance needs, and technology infrastructure to adapt government operations to the pandemic (e.g., video-conferencing software, data and case management systems)

**CAPITAL EXPENDITURES**

As described above, the final rule clarifies that recipients may use funds for programs, services, and capital expenditures that respond to the public health and negative economic impacts of the pandemic. Any use of funds in this category for a capital expenditure must comply with the capital expenditure requirements, in addition to other standards for uses of funds.

Capital expenditures are subject to the same eligibility standard as other eligible uses to respond to the pandemic's public health and economic impacts; specifically, they must be related and reasonably proportional to the pandemic impact identified and reasonably designed to benefit the impacted population or class.

For ease of administration, the final rule identifies enumerated types of capital expenditures that Treasury has identified as responding to the pandemic's impacts; these are listed in the applicable sub-category of eligible uses (e.g., public health, assistance to households, etc.). Recipients may also identify other responsive capital expenditures. Similar to other eligible uses in the SLFRF program, no pre-approval is required for capital expenditures.

To guide recipients' analysis of whether a capital expenditure meets the eligibility standard, recipients (with the exception of Tribal governments) must complete and meet the requirements of a written justification for capital expenditures equal to or greater than \$1 million. For large-scale capital expenditures, which have high costs and may require an extended length of time to complete, as well as most capital expenditures for non-enumerated uses of funds, Treasury requires recipients to submit their written justification as part of regular reporting. Specifically:

| If a project has total capital expenditures of | and the use is enumerated by Treasury as eligible, then | and the use is beyond those enumerated by Treasury as eligible, then |
|------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------|
| Less than \$1 million | No Written Justification required | No Written Justification required |
| Greater than or equal to \$1 million, but less than \$10 million | Written Justification required but recipients are not required to submit as part of regular reporting to Treasury | Written Justification required and recipients must submit as part of regular reporting to Treasury |
| \$10 million or more | Written Justification required and recipients must submit as part of regular reporting to Treasury | |

A Written Justification includes:

- *Description of the harm or need to be addressed.* Recipients should provide a description of the specific harm or need to be addressed and why the harm was exacerbated or caused by the public health emergency. Recipients may provide quantitative information on the extent and the type of harm, such as the number of individuals or entities affected.

- *Explanation of why a capital expenditure is appropriate.* For example, recipients should include an explanation of why existing equipment and facilities, or policy changes or additional funding to pertinent programs or services, would be inadequate.
- *Comparison of proposed capital project against at least two alternative capital expenditures and demonstration of why the proposed capital expenditure is superior.* Recipients should consider the effectiveness of the capital expenditure in addressing the harm identified and the expected total cost (including pre-development costs) against at least two alternative capital expenditures.

Where relevant, recipients should consider the alternatives of improving existing capital assets already owned or leasing other capital assets.

Treasury presumes that the following capital projects are generally ineligible:

- | | |
|---------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------|
| ✖ Construction of new correctional facilities as a response to an increase in rate of crime | ✖ Construction of convention centers, stadiums, or other large capital projects intended for general economic development or to aid impacted industries |
| ✖ Construction of new congregate facilities to decrease spread of COVID-19 in the facility | |

In undertaking capital expenditures, Treasury encourages recipients to adhere to strong labor standards, including project labor agreements and community benefits agreements that offer wages at or above the prevailing rate and include local hire provisions. Treasury also encourages recipients to prioritize in their procurements employers with high labor standards and to prioritize employers without recent violations of federal and state labor and employment laws.

**FRAMEWORK FOR ELIGIBLE USES BEYOND THOSE ENUMERATED**

As described above, recipients have broad flexibility to identify and respond to other pandemic impacts and serve other populations that experienced pandemic impacts, beyond the enumerated uses and presumed eligible populations. Recipients should undergo the following steps to decide whether their project is eligible:

| Step | 1. Identify COVID-19 public health or economic impact | 2. Design a response that addresses or responds to the impact |
|----------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Analysis | <ul style="list-style-type: none"> Can identify impact to a specific household, business or nonprofit or to a class of households, businesses or nonprofits (i.e., group) Can also identify disproportionate impacts, or more severe impacts, to a specific beneficiary or to a class | <ul style="list-style-type: none"> Types of responses can include a program, service, or capital expenditure Response should be related and reasonably proportional to the harm Response should also be reasonably designed to benefit impacted individual or class |

1. Identify a COVID-19 public health or negative economic impact on an individual or a class.

Recipients should identify an individual or class that is “impacted” or “disproportionately impacted” by the COVID-19 public health emergency or its negative economic impacts as well as the specific impact itself.

- “Impacted” entities are those impacted by the disease itself or the harmful consequences of the economic disruptions resulting from or exacerbated by the COVID-19 public health emergency. For example, an individual who lost their job or a small business that saw lower revenue during a period of closure would both have experienced impacts of the pandemic.
- “Disproportionately impacted” entities are those that experienced disproportionate public health or economic outcomes from the pandemic; Treasury recognizes that pre-existing disparities, in many cases, amplified the impacts of the pandemic, causing more severe impacts in underserved communities. For example, a household living in a neighborhood with limited access to medical care and healthy foods may have faced health disparities before the pandemic, like a higher rate of chronic health conditions, that contributed to more severe health outcomes during the COVID-19 pandemic.

The recipient may choose to identify these impacts at either the individual level or at a class level. If the recipient is identifying impacts at the individual level, they should retain documentation supporting the impact the individual experienced (e.g., documentation of lost revenues from a small business). Such documentation can be streamlined in many cases (e.g., self-attestation that a household requires food assistance).

Recipients also have broad flexibility to identify a “class” – or a group of households, small businesses, or nonprofits – that experienced an impact. In these cases, the recipients should

first identify the class and the impact that it faced. Then, recipients only need to document that the individuals served fall within that class; recipients do not need to document a specific impact to each individual served. For example, a recipient could identify that restaurants in the downtown area faced substantial declines in revenue due to decreased foot traffic from workers; the recipient could develop a program to respond to the impact on that class and only needs to document that the businesses being served are restaurants in the downtown area.

Recipients should keep the following considerations in mind when designating a class:

- **There should be a relationship between the definition of the class and the proposed response.** Larger and less-specific classes are less likely to have experienced similar harms, which may make it more difficult to design a response that appropriately responds to those harms.
 - **Classes may be determined on a population basis or on a geographic basis,** and the response should be appropriately matched. For example, a response might be designed to provide childcare to single parents, regardless of which neighborhood they live in, or a response might provide a park to improve the health of a disproportionately impacted neighborhood.
 - **Recipients may designate classes that experienced disproportionate impact,** by assessing the impacts of the pandemic and finding that some populations experienced meaningfully more severe impacts than the general public. To determine these disproportionate impacts, recipients:
 - May designate classes based on academic research or government research publications (such as the citations provided in the supplementary information in the final rule), through analysis of their own data, or through analysis of other existing data sources.
 - May also consider qualitative research and sources to augment their analysis, or when quantitative data is not readily available. Such sources might include resident interviews or feedback from relevant state and local agencies, such as public health departments or social services departments.
 - Should consider the quality of the research, data, and applicability of analysis to their determination in all cases.
 - **Some of the enumerated uses may also be appropriate responses to the impacts experienced by other classes of beneficiaries.** It is permissible for recipients to provide these services to other classes, so long as the recipient determines that the response is also appropriate for those groups.
 - **Recipients may designate a class based on income level, including at levels higher than the final rule definition of "low- and moderate-income."** For example, a recipient may identify that households in their community with incomes above the final rule threshold for low-income nevertheless experienced disproportionate impacts from the pandemic and provide responsive services.
2. **Design a response that addresses or responds to the impact.** Programs, services, and other interventions must be reasonably designed to benefit the individual or class that experienced

the impact. They must also be related and reasonably proportional to the extent and type of impact experienced. For example, uses that bear no relation or are grossly disproportionate to the type or extent of the impact would not be eligible.

“Reasonably proportional” refers to the scale of the response compared to the scale of the harm, as well as the targeting of the response to beneficiaries compared to the amount of harm they experienced; for example, it may not be reasonably proportional for a cash assistance program to provide a very small amount of aid to a group that experienced severe harm and a much larger amount to a group that experienced relatively little harm. Recipients should consider relevant factors about the harm identified and the response to evaluate whether the response is reasonably proportional. For example, recipients may consider the size of the population impacted and the severity, type, and duration of the impact. Recipients may also consider the efficacy, cost, cost-effectiveness, and time to delivery of the response.

For disproportionately impacted communities, recipients may design interventions that address broader pre-existing disparities that contributed to more severe health and economic outcomes during the pandemic, such as disproportionate gaps in access to health care or pre-existing disparities in educational outcomes that have been exacerbated by the pandemic.

Premium Pay

The Coronavirus State and Local Fiscal Recovery Funds may be used to provide premium pay to eligible workers performing essential work during the pandemic. Premium pay may be awarded to eligible workers up to \$13 per hour. Premium pay must be in addition to wages or remuneration (i.e., compensation) the eligible worker otherwise receives. Premium pay may not exceed \$25,000 for any single worker during the program.

Recipients should undergo the following steps to provide premium pay to eligible workers.

1. **Identify an “eligible” worker.** Eligible workers include workers “needed to maintain continuity of operations of essential critical infrastructure sectors.” These sectors and occupations are eligible:

- ✓ Health care
- ✓ Emergency response
- ✓ Sanitation, disinfection & cleaning
- ✓ Maintenance
- ✓ Grocery stores, restaurants, food production, and food delivery
- ✓ Pharmacy
- ✓ Biomedical research
- ✓ Behavioral health
- ✓ Medical testing and diagnostics
- ✓ Home and community-based health care or assistance with activities of daily living
- ✓ Family or child care
- ✓ Social services
- ✓ Public health
- ✓ Mortuary
- ✓ Critical clinical research, development, and testing necessary for COVID-19 response
- ✓ State, local, or Tribal government workforce
- ✓ Workers providing vital services to Tribes
- ✓ Educational, school nutrition, and other work required to operate a school facility
- ✓ Laundry
- ✓ Elections
- ✓ Solid waste or hazardous materials management, response, and cleanup
- ✓ Work requiring physical interaction with patients
- ✓ Dental care
- ✓ Transportation and warehousing
- ✓ Hotel and commercial lodging facilities that are used for COVID-19 mitigation and containment

Beyond this list, the chief executive (or equivalent) of a recipient government may designate additional non-public sectors as critical so long as doing so is necessary to protecting the health and wellbeing of the residents of such jurisdictions.

2. **Verify that the eligible worker performs “essential work,”** meaning work that:

- Is not performed while teleworking from a residence; and
- Involves either:
 - a. regular, in-person interactions with patients, the public, or coworkers of the individual that is performing the work; or
 - b. regular physical handling of items that were handled by, or are to be handled by, patients, the public, or coworkers of the individual that is performing the work.

3. Confirm that the premium pay “responds to” workers performing essential work during the COVID-19 public health emergency. Under the final rule, which broadened the share of eligible workers who can receive premium pay without a written justification, recipients may meet this requirement in one of three ways:

- Eligible worker receiving premium pay is earning (with the premium included) at or below 150 percent of their residing state or county’s average annual wage for all occupations, as defined by the Bureau of Labor Statistics’ [Occupational Employment and Wage Statistics](#), whichever is higher, on an annual basis; or
- Eligible worker receiving premium pay is not exempt from the Fair Labor Standards Act overtime provisions; or
- If a worker does not meet either of the above requirements, the recipient must submit written justification to Treasury detailing how the premium pay is otherwise responsive to workers performing essential work during the public health emergency. This may include a description of the essential worker’s duties, health, or financial risks faced due to COVID-19, and why the recipient determined that the premium pay was responsive. Treasury anticipates that recipients will easily be able to satisfy the justification requirement for front-line workers, like nurses and hospital staff.

Premium pay may be awarded in installments or lump sums (e.g., monthly, quarterly, etc.) and may be awarded to hourly, part-time, or salaried or non-hourly workers. Premium pay must be paid in addition to wages already received and may be paid retrospectively. A recipient may not use SLFRF to merely reimburse itself for premium pay or hazard pay already received by the worker, and premium pay may not be paid to volunteers.

Water & Sewer Infrastructure

The Coronavirus State and Local Fiscal Recovery Funds may be used to make necessary investments in water and sewer infrastructure. State, local, and Tribal governments have a tremendous need to address the consequences of deferred maintenance in drinking water systems and removal, management, and treatment of sewage and stormwater, along with additional resiliency measures needed to adapt to climate change.

Recipients may undertake the eligible projects below:

PROJECTS ELIGIBLE UNDER EPA'S CLEAN WATER STATE REVOLVING FUND (CWSRF)

Eligible projects under the CWSRF, and the final rule, include:

- ✓ Construction of publicly owned treatment works
- ✓ Projects pursuant to implementation of a nonpoint source pollution management program established under the Clean Water Act (CWA)
- ✓ Decentralized wastewater treatment systems that treat municipal wastewater or domestic sewage
- ✓ Management and treatment of stormwater or subsurface drainage water
- ✓ Water conservation, efficiency, or reuse measures
- ✓ Development and implementation of a conservation and management plan under the CWA
- ✓ Watershed projects meeting the criteria set forth in the CWA
- ✓ Energy consumption reduction for publicly owned treatment works
- ✓ Reuse or recycling of wastewater, stormwater, or subsurface drainage water
- ✓ Security of publicly owned treatment works

Treasury encourages recipients to review the EPA handbook for the [CWSRF](#) for a full list of eligibilities.

PROJECTS ELIGIBLE UNDER EPA'S DRINKING WATER STATE REVOLVING FUND (DWSRF)

Eligible drinking water projects under the DWSRF, and the final rule, include:

- ✓ Facilities to improve drinking water quality
- ✓ Transmission and distribution, including improvements of water pressure or prevention of contamination in infrastructure and lead service line replacements
- ✓ New sources to replace contaminated drinking water or increase drought resilience, including aquifer storage and recovery system for water storage
- ✓ Green infrastructure, including green roofs, rainwater harvesting collection, permeable pavement
- ✓ Storage of drinking water, such as to prevent contaminants or equalize water demands
- ✓ Purchase of water systems and interconnection of systems
- ✓ New community water systems

Treasury encourages recipients to review the EPA handbook for the [DWSRF](#) for a full list of eligibilities.

ADDITIONAL ELIGIBLE PROJECTS

With broadened eligibility under the final rule, SLFRF funds may be used to fund additional types of projects— such as additional stormwater infrastructure, residential wells, lead remediation, and certain rehabilitations of dams and reservoirs — beyond the CWSRF and DWSRF, if they are found to be “necessary” according to the definition provided in the final rule and outlined below.

- ✓ Culvert repair, resizing, and removal, replacement of storm sewers, and additional types of stormwater infrastructure
- ✓ Infrastructure to improve access to safe drinking water for individual served by residential wells, including testing initiatives, and treatment/remediation strategies that address contamination
- ✓ Dam and reservoir rehabilitation if primary purpose of dam or reservoir is for drinking water supply and project is necessary for provision of drinking water
- ✓ Broad set of lead remediation projects eligible under EPA grant programs authorized by the Water Infrastructure Improvements for the Nation (WIIN) Act, such as lead testing, installation of corrosion control treatment, lead service line replacement, as well as water quality testing, compliance monitoring, and remediation activities, including replacement of internal plumbing and faucets and fixtures in schools and childcare facilities

A “necessary” investment in infrastructure must be:

- (1) responsive to an identified need to achieve or maintain an adequate minimum level of service, which may include a reasonable projection of increased need, whether due to population growth or otherwise,
- (2) a cost-effective means for meeting that need, taking into account available alternatives, and
- (3) for investments in infrastructure that supply drinking water in order to meet projected population growth, projected to be sustainable over its estimated useful life.

Please note that DWSRF and CWSRF-eligible projects are generally presumed to be necessary investments. Additional eligible projects generally must be responsive to an identified need to achieve or maintain an adequate minimum level of service. Recipients are only required to assess cost-effectiveness of projects for the creation of new drinking water systems, dam and reservoir rehabilitation projects, or projects for the extension of drinking water service to meet population growth needs. Recipients should review the supplementary information to the final rule for more details on requirements applicable to each type of investment.

APPLICABLE STANDARDS & REQUIREMENTS

Treasury encourages recipients to adhere to strong labor standards, including project labor agreements and community benefits agreements that offer wages at or above the prevailing rate and include local hire provisions. Treasury also encourages recipients to prioritize in their procurements employers with high labor standards and to prioritize employers without recent violations of federal and state labor and employment laws.

Broadband Infrastructure

The Coronavirus State and Local Fiscal Recovery Funds may be used to make necessary investments in broadband infrastructure, which has been shown to be critical for work, education, healthcare, and civic participation during the public health emergency. The final rule broadens the set of eligible broadband infrastructure investments that recipients may undertake.

Recipients may pursue investments in broadband infrastructure meeting technical standards detailed below, as well as an expanded set of cybersecurity investments.

BROADBAND INFRASTRUCTURE INVESTMENTS

Recipients should adhere to the following requirements when designing a broadband infrastructure project:

1. **Identify an eligible area for investment.** Recipients are encouraged to prioritize projects that are designed to serve locations without access to reliable wireline 100/20 Mbps broadband service (meaning service that reliably provides 100 Mbps download speed and 20 Mbps upload speed through a wireline connection), but are broadly able to invest in projects designed to provide service to locations with an identified need for additional broadband investment. Recipients have broad flexibility to define need in their community. Examples of need could include:

- ✓ Lack of access to a reliable high-speed broadband connection
- ✓ Lack of affordable broadband
- ✓ Lack of reliable service

If recipients are considering deploying broadband to locations where there are existing and enforceable federal or state funding commitments for reliable service of at least 100/20 Mbps, recipients must ensure that SLFRF funds are designed to address an identified need for additional broadband investment that is not met by existing federal or state funding commitments. Recipients must also ensure that SLFRF funds will not be used for costs that will be reimbursed by the other federal or state funding streams.

2. **Design project to meet high-speed technical standards.** Recipients are required to design projects to, upon completion, reliably meet or exceed symmetrical 100 Mbps download and upload speeds. In cases where it is not practicable, because of the excessive cost of the project or geography or topography of the area to be served by the project, eligible projects may be designed to reliably meet or exceed 100/20 Mbps and be scalable to a minimum of symmetrical 100 Mbps download and upload speeds.

Treasury encourages recipients to prioritize investments in fiber-optic infrastructure wherever feasible and to focus on projects that will achieve last-mile connections. Further, Treasury encourages recipients to prioritize support for broadband networks owned, operated by, or affiliated with local governments, nonprofits, and co-operatives.

3. **Require enrollment in a low-income subsidy program.** Recipients must require the service provider for a broadband project that provides service to households to either:

- ✓ Participate in the FCC's Affordable Connectivity Program (ACP)
- ✓ Provide access to a broad-based affordability program to low-income consumers that provides benefits commensurate to ACP

Treasury encourages broadband services to also include at least one low-cost option offered without data usage caps at speeds sufficient for a household with multiple users to simultaneously telework and engage in remote learning. Recipients are also encouraged to consult with the community on affordability needs.

CYBERSECURITY INVESTMENTS

SLFRF may be used for modernization of cybersecurity for existing and new broadband infrastructure, regardless of their speed delivery standards. This includes modernization of hardware and software.

APPLICABLE STANDARDS & REQUIREMENTS

Treasury encourages recipients to adhere to strong labor standards, including project labor agreements and community benefits agreements that offer wages at or above the prevailing rate and include local hire provisions. Treasury also encourages recipients to prioritize in their procurements employers with high labor standards and to prioritize employers without recent violations of federal and state labor and employment laws.

Restrictions on Use

While recipients have considerable flexibility to use Coronavirus State and Local Fiscal Recovery Funds to address the diverse needs of their communities, some restrictions on use of funds apply.

OFFSET A REDUCTION IN NET TAX REVENUE

- **States and territories may not use this funding to directly or indirectly offset a reduction in net tax revenue resulting from a change in law, regulation, or administrative interpretation beginning on March 3, 2021, through the last day of the fiscal year in which the funds provided have been spent.** If a state or territory cuts taxes during this period, it must demonstrate how it paid for the tax cuts from sources other than SLFRF, such as by enacting policies to raise other sources of revenue, by cutting spending, or through higher revenue due to economic growth. If the funds provided have been used to offset tax cuts, the amount used for this purpose must be repaid to the Treasury.

DEPOSITS INTO PENSION FUNDS

- **No recipients except Tribal governments may use this funding to make a deposit to a pension fund.** Treasury defines a “deposit” as an extraordinary contribution to a pension fund for the purpose of reducing an accrued, unfunded liability. While pension deposits are prohibited, recipients may use funds for routine payroll contributions connected to an eligible use of funds (e.g., for public health and safety staff). Examples of extraordinary payments include ones that:
 - ✗ Reduce a liability incurred prior to the start of the COVID-19 public health emergency and occur outside the recipient's regular timing for making the payment
 - ✗ Occur at the regular time for pension contributions but is larger than a regular payment would have been

ADDITIONAL RESTRICTIONS AND REQUIREMENTS

Additional restrictions and requirements that apply across all eligible use categories include:

- **No debt service or replenishing financial reserves.** Since SLFRF funds are intended to be used prospectively, recipients may not use SLFRF funds for debt service or replenishing financial reserves (e.g., rainy day funds).
- **No satisfaction of settlements and judgments.** Satisfaction of any obligation arising under or pursuant to a settlement agreement, judgment, consent decree, or judicially confirmed debt restructuring in a judicial, administrative, or regulatory proceeding is itself not an eligible use. However, if a settlement requires the recipient to provide services or incur other costs that are an eligible use of SLFRF funds, SLFRF may be used for those costs.
- **Additional general restrictions.** SLFRF funds may not be used for a project that conflicts with or contravenes the purpose of the American Rescue Plan Act statute (e.g., uses of funds that

Coronavirus State & Local Fiscal Recovery Funds: Overview of the Final Rule

U.S. DEPARTMENT OF THE TREASURY

undermine COVID-19 mitigation practices in line with CDC guidance and recommendations) and may not be used in violation of the Award Terms and Conditions or conflict of interest requirements under the Uniform Guidance. Other applicable laws and regulations, outside of SLFRF program requirements, may also apply (e.g., laws around procurement, contracting, conflicts-of-interest, environmental standards, or civil rights).

Program Administration

The Coronavirus State and Local Fiscal Recovery Funds final rule details a number of administrative processes and requirements, including on distribution of funds, timeline for use of funds, transfer of funds, treatment of loans, use of funds to meet non-federal match or cost-share requirements, administrative expenses, reporting on use of funds, and remediation and recoupment of funds used for ineligible purposes. This section provides a summary for the most frequently asked questions.

TIMELINE FOR USE OF FUNDS

Under the SLFRF, funds must be used for costs incurred on or after March 3, 2021. Further, costs must be obligated by December 31, 2024, and expended by December 31, 2026.

TRANSFERS

Recipients may undertake projects on their own or through subrecipients, which carry out eligible uses on behalf of a recipient, including pooling funds with other recipients or blending and braiding SLFRF funds with other sources of funds. Localities may also transfer their funds to the state through section 603(c)(4), which will decrease the locality's award and increase the state award amounts.

LOANS

Recipients may generally use SLFRF funds to provide loans for uses that are otherwise eligible, although there are special rules about how recipients should track program income depending on the length of the loan. Recipients should consult the final rule if they seek to utilize these provisions.

NON-FEDERAL MATCH OR COST-SHARE REQUIREMENTS

Funds available under the "revenue loss" eligible use category (sections 602(c)(1)(C) and 603(c)(1)(C) of the Social Security Act) generally may be used to meet the non-federal cost-share or matching requirements of other federal programs. However, note that SLFRF funds may not be used as the non-federal share for purposes of a state's Medicaid and CHIP programs because the Office of Management and Budget has approved a waiver as requested by the Centers for Medicare & Medicaid Services pursuant to 2 CFR 200.102 of the Uniform Guidance and related regulations.

SLFRF funds beyond those that are available under the revenue loss eligible use category may not be used to meet the non-federal match or cost-share requirements of other federal programs, other than as specifically provided for by statute. As an example, the Infrastructure Investment and Jobs Act provides that SLFRF funds may be used to meet the non-federal match requirements of authorized Bureau of Reclamation projects and certain broadband deployment projects. Recipients should consult the final rule for further details if they seek to utilize SLFRF funds as a match for these projects.

ADMINISTRATIVE EXPENSES

SLFRF funds may be used for direct and indirect administrative expenses involved in administering the program. For details on permissible direct and indirect administrative costs, recipients should refer to Treasury's [Compliance and Reporting Guidance](#). Costs incurred for the same purpose in like circumstances must be treated consistently as either direct or indirect costs.

Coronavirus State & Local Fiscal Recovery Funds: Overview of the Final Rule

REPORTING, COMPLIANCE & RECOUPMENT

Recipients are required to comply with Treasury's [Compliance and Reporting Guidance](#), which includes submitting mandatory periodic reports to Treasury.

Funds used in violation of the final rule are subject to remediation and recoupment. As outlined in the final rule, Treasury may identify funds used in violation through reporting or other sources. Recipients will be provided with an initial written notice of recoupment with an opportunity to submit a request for reconsideration before Treasury provides a final notice of recoupment. If the recipient receives an initial notice of recoupment and does not submit a request for reconsideration, the initial notice will be deemed the final notice. Treasury may pursue other forms of remediation and monitoring in conjunction with, or as an alternative to, recoupment.

DRAFT

Small Business American Rescue Plan (ARP) Grant Fund Parameters

Small businesses eligible for assistance are those that experienced negative economic impacts or disproportionate impacts of the pandemic and meet the definition of “small business”.

Grant Details & Eligibility:

To be eligible, you must be either a:

- Small business or enterprise - Colorado sole proprietors and registered small businesses including LLCs, S-Corps and other business types.
- Small Non-Profit Business - 501c3 nonprofit businesses only.

You must also:

- Be located in Foxfield, Colorado.
- Have fewer than 500 full and part-time employees.
- Have experienced economic harm that was caused or made worse by the COVID-19 public health emergency. Applicants must clearly describe the harm experienced. Additional documentation may be required to validate the described harm.
- Use funds, if awarded, to respond to the described harm. **The intended use must not have been covered with other COVID-19 relief funds.**
- Business activities are legal under Colorado AND Federal law.
- Applicant business was in operation on or before December 31st, 2020 and has filed a 2020 tax return or 2020 tax return extension.
- Applicant business is currently operating.
- Applicant business and business owner do not have any outstanding judgments, tax liens, or pending lawsuits against them.
- Have all required licenses and registrations to operate.

Grant funds may be used for:

- Mitigation of financial hardship, such as supporting payroll and benefits, costs to retain employees.
- Mortgage, rent, utility, and other operating costs.
- Technical assistance, counseling, or other services to support business planning.

Applicants may ask for a grant up to \$10,000. However, the Town has a limited pool of funds, and the award may be less than requested depending on the number of grant applications the Town receives. The applicant will be required to identify the specific business-related costs the amount asked for would apply to. Total grant request must match the sum of the individual line items of approved business-related expenses.

MEMORANDUM

TO: Mayor Jones and Members of the Board

FROM: Karen Proctor, Town Administrator

DATE: February 17, 2022

RE: Gates

DISCUSSION:

Staff would like the Board to discuss and provide input regarding cameras for the gates, gate barriers and the forming of a Gate Committee.

CAMERAS

The Board approved \$2,000 in the 2022 budget for gate cameras. The cost estimate received from DGO is \$10,134.04 and is attached as Exhibit B. Trustee Farreau and her husband have put together an alternative cost estimate for all the equipment at \$988 with the possibility of additional costs for labor to install the cameras. The attached exhibits show a comparison between the two estimates, in addition to images from the cameras that are being proposed by Trustee Farreau.

BARRIERS

It has been observed, and evidence suggests, that cars are driving around the Fremont gates. In addition, cars are driving on private property at the Richfield gate to turn around. Mayor Jones met on site with Terracare to discuss how to address the problem. Terracare has suggested the following options:

- Split rail fence/ 2 rail approx. \$25.00/linear foot installed
- Split rail fence/ 3 rail approx. \$32.00/ linear foot installed
- Guardrail 6x6" post and 2x8" rail approx. \$25.50/linear foot installed
- Boulders \$300-\$350 each installed

The pictures attached at Fremont from the CDOT property marker on the westside up to Easter Way is approximately 280 linear feet and at Richfield from the trail head south is approximately 100 linear feet.

A one-ton granite boulder is approximately 3'x3'x3 feet and would be spaced 7 feet apart. We will need one boulder for every 10 feet or approximately 28-29 boulders at Fremont.

Following are cost estimates for each option and location:

| OPTIONS | FREMONT | RICHFIELD |
|--------------------|-------------|------------|
| Split Rail/2 rails | \$ 7,000.00 | \$2,500.00 |
| Split Rail/3 rails | \$ 8,960.00 | \$3,200.00 |
| Guardrails | \$ 7,140.00 | \$2,550.00 |
| Boulders | \$10,150.00 | \$ - |

The boulders are a more natural look, more permanent and blend in more than the delineators. It is less likely to have cars trying to drive between them to get around the gates. Boulders will not need maintenance other than the mowing crews will need to trim around them, but that would also be necessary with a fence.

The fence and wood guard rail will work well but will require some maintenance and can be damaged by vehicles, tractors & mowers.

All materials are volatile right now, so price and availability can be an issue, boulders are not as much of an issue as lumber is at this time.

GATE COMMITTEE

The suggestion to form a Gate Committee was discussed at the Board meeting on January 20, 2022, and a decision was made to continue the discussion when more Board members were in attendance. The Committee would be charged with making gate decisions, then bring them to the Board for approval. The committee would consist of a few Trustees.

ATTACHMENTS:

Exhibit A: Gate Security Camera Comparison

Exhibit B: DGO Camera Proposal

Exhibit C: Alternative Proposal Cost Estimate

Exhibit D: Detailed Camera Components

Exhibit E: Method to download camera video/images

Enjoy fast, **FREE delivery**, exclusive deals and award-winning movies & TV

- **EXPERIENCE ULTRA HD** – Stunning low-light 5MP performance with 1/2.7" image sensor and 5MP resolution (2592x1944). Super-wide 103° viewing angle allows you to cover more ground. Power Over Ethernet (POE camera) for easy installation (POE Injector or Switch Required; Not Included, Sold Separately). This is a FIXED IP camera and has ability to Pan/Tilt manually.
- **SMARTER SECURITY & STORAGE OPTIONS** – Receive motion alert notifications and review footage via your smartphone with the Amcrest View app. Playback and record professionally on a PC using the Amcrest Surveillance Pro software or third-party software such as Blue Iris. Works with Amcrest Cloud remote video storage, MicroSD Card (up to 256GB), Amcrest NVRs, QNAP NAS, FTP, Edge, Chrome, Mozilla Firefox & Safari.
- **DAY OR NIGHT, RAIN OR SHINE** – Built to whether any storm and the darkest of nights, this 5-Megapixel Dome PoE IP Camera features a heavy-duty metal weatherproof IP67 housing & IK10 Vandal Resistant Dome as well as built-in IR LEDs and a 1/2.7" progressive image sensor to achieve unsurpassed low-light capability and night-vision up to 98 feet. Dual H.265/H.246 compression allows for maximum encryption with the latest technology as well as backwards compatibility with legacy platforms.
- **SECURE CLOUD VIDEO BACKUP** – The optional Amcrest Cloud remote video storage subscription service allows you to automatically store your videos off-site in a third-party location hosted and secured by Amazon AWS. This way if something happens to your local PC/NVR/SDcard/NAS, the footage will be safely recorded in a secure off-site location and accessible to you through a web-based Flash interface for PC (Chrome/Firefox/Safari/Edge) and AmcrestCloud smartphone app.
- **SIMPLE, RELIABLE, SECURE** - At Amcrest, we want to ensure the safety of our customers, their loved ones, homes and businesses. You'll receive a full 1-year US Warranty and Lifetime Support provided directly from Amcrest. Compatible with the following Amcrest Junction Boxes, ASIN: B0711CPL5Z, B071L2RDK2

About this item

- Ideal for Android smartphones and tablets, and MIL cameras
- Up to 256GB to store even more hours of Full HD video (2). 1GB=1,000,000,000 bytes. 1TB=1,000,000,000,000 bytes. Actual user storage less. (2) Full HD (1920x1080) video support may vary based upon host device, file attributes, and other factors. See official SanDisk website.
- Up to 120MB/s transfer speeds let you move up to 1000 photos in a minute (5). Up to 120MB/s read speed, engineered with proprietary technology to reach speeds beyond UHS-I 104MB/s, require compatible devices capable of reaching such speed. Write speeds lower. Based on internal testing; performance may be lower depending on host device, interface, usage conditions and other factors. 1MB=1,000,000 bytes. (5)Based on internal testing on images with an average file size of 3.55MB (up to 3.7GB total) with USB 3.0 reader. Your results will vary based on host device, file attributes, and other factors.
- Load apps faster with A1-rated performance (1). (1) A1 performance is 1500 read IOPS, 500 write IOPS. Based on internal testing. Results may vary based on host device, app type and other factors.

- 🔄 1-Year Warranty 🔄: 1 x Power Adapter; 1 x Power Cord Included. We will provide 1 year manufacturer warranty and 30 days return - we've got your back!
- 🔄 Notice 🔄: Note1: The power adapter is actually a fragile electronic component. The internal components cannot withstand knocks. In particular, prevent falling from a high place during use, and do not throw, knock, or shake the charger. Rough handling of the charger will damage the internal circuit board and cause malfunctions. Note 2: High temperature will shorten the life of electronic equipment, damage the charger, and deform or melt certain plastic parts. Do not store the adapter in a cold place. When the adapter is working in a cold environment, when the internal temperature rises, moisture will form in the charger and damage the circuit board.
- 🔄 Notice 🔄: Note 3: Clean the charging port of the power adapter regularly. Because the plug is prone to fouling after long-term use. If it is not cleaned up in time, it will cause poor contact of the plug and even cause the adapter to fail to work. Note4: Long-term power on will keep the adapter in working condition and affect its service life.
- 🔄 Notice 🔄: Note5 : Pay special attention to the connection of the adapter. The bending angle of the wire should not be too large, otherwise the wire may break. The connection of the power adapter should also avoid bending, otherwise it will cause poor contact. Note6: Although the adapters are all broadband operating voltages, marked from 100V-240V, if the voltage is unstable, it will cause damage.
- 🔄 Notice 🔄: Note7 : Due to the different sizes of sockets or power strips, please confirm whether the plug size of our adapter can match your socket or power strip before purchasing. Avoid buying the wrong or unsuitable adapter.

- About this item
- High quality Category 6 (CAT6) patch cables are the solution to your internetworking needs
 - With a blazing speed of up to 550MHz you can connect to your LAN/WAN segments and networking gear at maximum speed
 - Also with its superior connector you get a cable that is built for speed and endurance
 - Monoprice Cat5e and Cat6 cables are made of 24 AWG pure bare copper wire as opposed to copper clad aluminum (CCA) wire and are therefore fully compliant with UL Code 444 and National Electrical Code TIA-568-C
 - 2 fire and safety standards which require pure bare copper wire in Cat5e and Cat6 communications cables

| Gauge | 18.0 |

About this item

- ★ **【Real Thick 18AWG】** - Real 18AWG vs Common 22AWG, real 18AWG are bigger wire than other 22AWG pigtails, as it has heavy gauge with 43 pcs 0.14 mm 100% copper strands inside one cable, total 86 pcs 0.14 mm copper strands inside the two Red / Black cables. This makes the difference when using with bigger power supplies, and allows them to be used for higher current devices, they should be good to 5A or even a touch more with real 18AWG.
- ★ **【Safe & Rapid Transmission】** - Heavy-duty quality with 43 x 0.14 mm 100% copper strands brings the reliable, secure connection and rapid transmission. 18AWG DC Power Pigtail Cable provides a more safer DIY solution for DC power connectivity, work with a power adapter or a power supply box.
- ★ **【Easy Installation】** - Easy to weld and install, as the ends of the DC power pigtail cables are pre-tinned making them super easy to solder. Also features two wires on the other Red Black wire jackets indicate polarity. They are fairly long too, 11" total, 9.5" of wire.

About this item

- ★ **【What You Get:】** In this terminal block set, it include 5pcs 6 positions double row screw terminal strip blocks with cover, 5pcs black and red pre-insulated barrier jumper strips, 60pcs insulated fork wire connectors. Total 70pcs are well packed in a bag.
- ★ **【High Quality:】** The terminal blocks are high quality flame retardant PC engineering materials, with excellent flame retardant and impact resistance (transparent dust cover is not flame retardant). High-quality brass guide, excellent electrical conductivity, the appearance of nickel-plated, rust and durable.
- ★ **【Product Feature:】** The dual row terminal blocks are designed with screws, you can crank down on them for a firm bite; Also include a clear cover to protect accidental touching of the terminal. Transparent cover, clear and intuitive internal components, allows for visual inspection of insert terminals.
- ★ **【Easy to Install:】** The terminal strips are easy to install and hold in place by two screw holes at either end of the terminal. One mounting hole each end for fixed mounting.The fork terminal stripe can be cut in any position to meet with your different demand. Come with 60pcs 22-16(red) /16-14 (blue) /12-10(yellow) fork spade wire connectors for easy wire connecting.
- ★ **【Pratical Terminal Blocks:】** Each pair of terminals is insulated from the next, prevent circuit in disorder. The furcate pre-insulated terminal is easy to connect with electrical wire to strengthen its reliability and safety. Widely used in the machinery, electric power, railway, shipbuilding, aviation, home appliance, computer or other automatic equipments.

Gauge18.0

About this item

- High Conductivity: 41 strands of Pure copper wire are inside each cable. High precision Oxygen-free copper conducts electricity well. Compared with aluminum materials, it has lower resistance and higher conductivity.
- Durable Material: The jacket/insulation materials are PVC(RoHs), which protects the wire against abrasion, resistant to sunlight and chemicals. The rated operating temperature up to 80°C/176°F.
- Easy to Use: The Red & Black Pure coppe Hookup Wire is flexible, easy to solder, that is for low voltage(5V-12V-24V) installations.
- Wide range of uses : low-voltage cable extension cords are very suitable for LED monochromatic light strips, electronic appliances and equipment, transformers, led lights, led splitter connections, etc.
- High Quality: We commit to provide high quality products and customer satisfaction, The electricity wire we provided passed UL harsh testing that guaranteed long lifespan usage.

This is the image a user sees before a time is selected.

Bottom gray, green and yellow bars show a 2 hour span. User can also select 24 hours, 1 hour or 30 minutes. The gray bar shows time that is not recorded, green shows constant record on, yellow shows detected event (movement).

User can download MP4 (video) of time span by using the cut button (scissor icon).

Individual time files are listed under "start time file type" list. User can download file with the down arrow.

IR view (infrared image)

See the cursor in the green bar, before the first yellow bar between 18:05 and 18:10 time bar. This is used in the cut function to download video.

IR is reflected by all paint colors on license plate, cannot read license plate number because of this reflection.
